

PDi Spirit License Transfer | Replacement

Email transfer request to sales@pdispirit.co.za

Please note the following with regards to your PDi Spirit license:

- All PDi Spirit software licenses are based on a unique Machine ID (MID). The MID is generated by using your hard drive's unique serial number, your operating systems serial number and your computer name. A single purchased license will never have two Machine IDs registered.
- Each PDi application requires a unique license file that is linked to an individual MID / computer.
- A license file cannot be moved from one workstation to another as the MID will change.
- Should you replace or format your computer you will need to apply for a license transfer, this requires the suspension of your existing license based on the old MID and the issuing of a replacement license based on your new MID.
- Once a MID is suspended it cannot be automatically reactivated and a transfer request will need to be submitted.
- PDi Spirit or one of its authorized dealers, distributors or representatives reserve the right to audit machines to ensure that the transferred license file is no longer being used. This right can be exercised at any time without any prior arrangement or notification.

License Transfer:	License Replacement:
If you are replacing the computer, you will need to do the following: <ol style="list-style-type: none">1. Un-register the license on your existing computer2. Send the un-register code3. New registration form4. Completed License Transfer Request	If you are formatting the computer, you will need to do the following: <ol style="list-style-type: none">1. New registration form2.
